To All Owners,

Attached please find a layout of where the Restoration Project swing stages are currently located. Note that work has begun on Drop #19 which is the North facing side of the A-Stack. It is expected that Drop #28 will be completed in the next week and that swing stage will move to Drop #18, the West facing side of A.

Also, for your information, all 59 pigeon holes (openings in the roof overhang which facilitate ropes for swing stages, etc.) of The Barrton are being replaced. During the removal of the existing steel pigeon holes, water and dust will fall from the overhang and may produce smears on the windows below. These materials will not cause damage to the window frame nor scratch the window glass, and will likely be removed naturally by our summer rains. As you have been previously informed, The Barrton will not undertake any exterior window washing until completion of the Structural Restoration Project.

If you have any questions, please let myself or a member of the Task Force know.

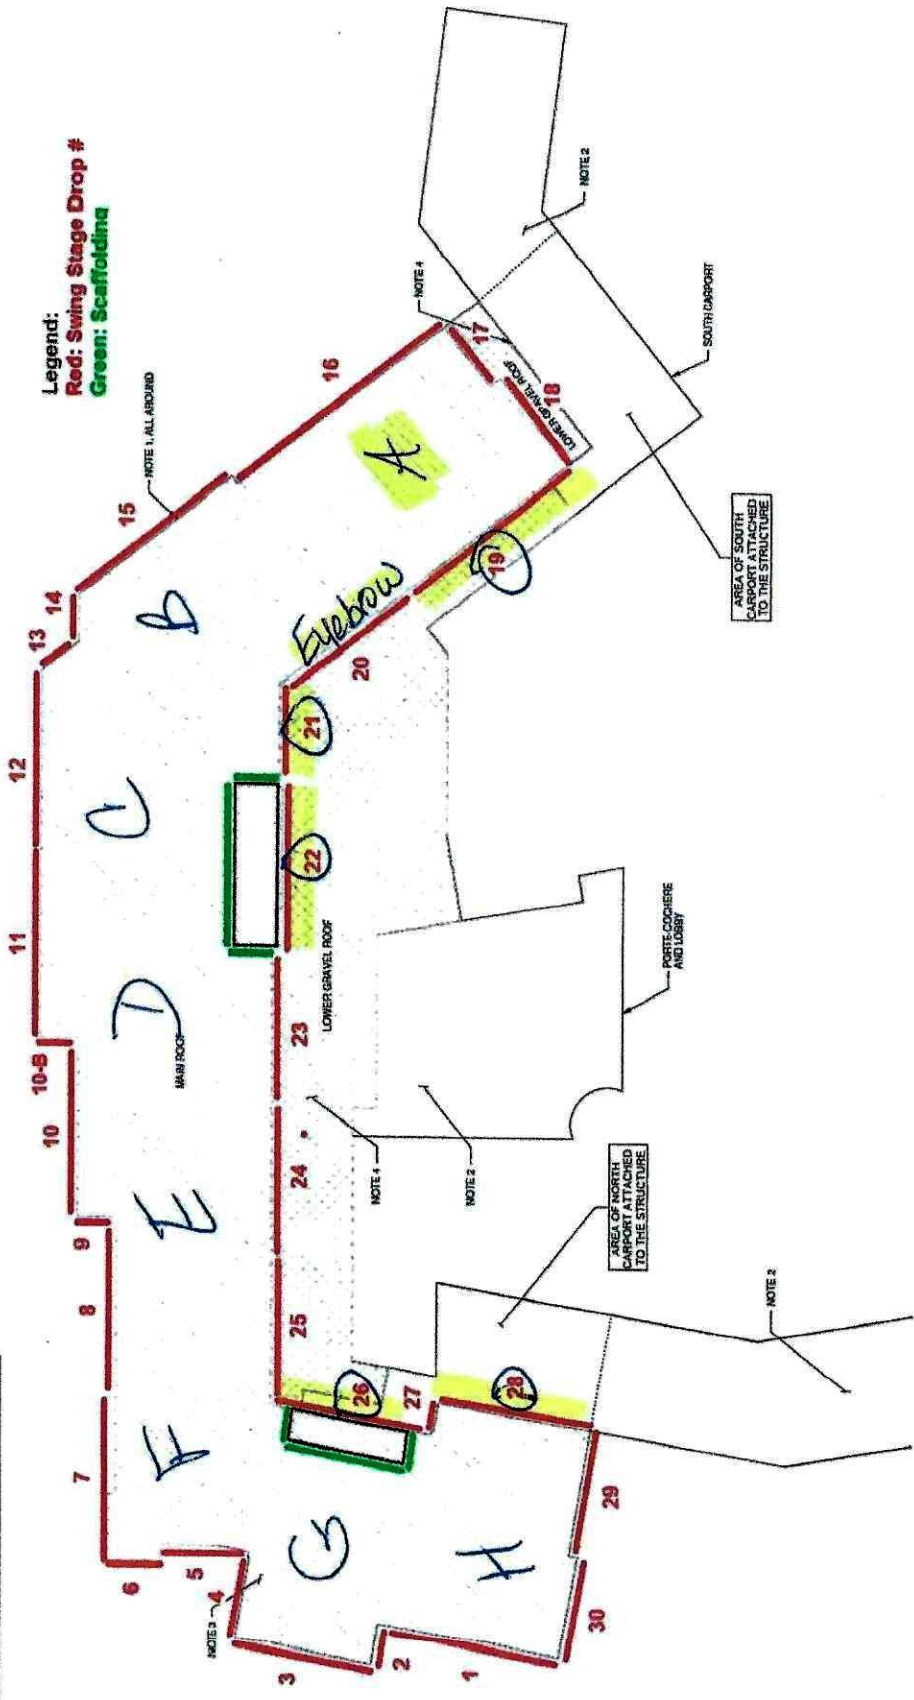

Thank you,

*\*This notification has been emailed blind copy to all owners, posted on site at The Barrton, and uploaded to The Barrton website.*
